

Evidex EvidenceOps

A claim-to-record review highlighting a reported quantity discrepancy and the underlying records still needed.

Illustrative demonstration

The following pages use fictional source records prepared for controlled testing. They are examples of the service output, not actual customer results or an independent professional endorsement.

Capturing a statement does not independently verify it. Records, period and population need reconciliation.

A customer engagement starts with your actual source material, an agreed scope, and an identified reviewer. Final interpretation and release remain with the accountable person.

Synthetic community workshop evidence reconciliation

Evidex EvidenceOps · review copy

Claims and documentary leads

Reported documentary leads and arithmetic comparisons; no independent verification, outcome certification or donor approval.

Record	Exact supplied statement
CLAIM	Claim C1 says 14 community workshops were delivered.
ATTENDANCE	Attendance sheets support 12 workshops.
EMAIL	Two additional workshops are mentioned only in an email summary.
PHOTO	Three photographs lack dates or event identifiers.

Reported quantities to reconcile

Claim	Declared quantity	Reported record quantity	Difference	Boundary
C1	14	12	-2	Period, population and source authenticity not established; possible comparison only.

Questions and records to obtain

Record	Reviewer action
EMAIL	Obtain the underlying dated, identified record and resolve this source-reported limitation: Two additional workshops are mentioned only in an email summary.
PHOTO	Obtain the underlying dated, identified record and resolve this source-reported limitation: Three photographs lack dates or event identifiers.
ATTENDANCE	Reconcile claim C1 (14) with the reported record (12); obtain the underlying record and establish matching period/population. Do not sum email, invoice and photo references as verified delivery counts.

The underlying source records, engine output and supporting-document candidates remain available for review. No source assertion has been independently verified.
