

Report & Pitch Studio

A source-linked decision brief, transparent calculations and an editable presentation.

Illustrative demonstration

The following pages use fictional source records prepared for controlled testing. They are examples of the service output, not actual customer results or an independent professional endorsement.

Editorial interpretation, recommendations and publication require review.

A customer engagement starts with your actual source material, an agreed scope, and an identified reviewer. Final interpretation and release remain with the accountable person.

Harbour clinic pilot — quarterly decision brief

Decision and scope

Decide whether to extend the mobile clinic pilot for one quarter.

Prepared for Clinic operations committee. Supplied-source analysis; editorial, expert and release approval remain pending.

Executive evidence brief

The pilot completed 240 appointments in September 2026. [OPS-P1; OPS]
Waiting time fell from 18 days to 11 days. [OPS-P2; OPS]
The log does not establish a causal effect on clinical outcomes. [OPS-P3; OPS]
Operating costs were R180000 in September 2026. [FIN-P1; FIN]

Pilot service log

The pilot completed 240 appointments in September 2026. [OPS-P1; OPS]

Waiting time fell from 18 days to 11 days. [OPS-P2; OPS]

The log does not establish a causal effect on clinical outcomes. [OPS-P3; OPS]

Reported measurements

Source-reported values

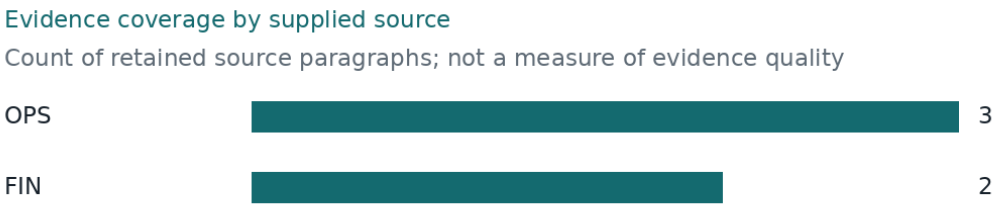

Measure	Value	Unit	Period	Source
Appointments	240	appointments	September 2026	[OPS]
Operating costs	180000	ZAR	September 2026	[FIN]

Analysis from the supplied figures

Operating cost per completed appointment

Operating cost per completed appointment: 750 ZAR/appointments (September 2026). Calculation: 180000 / 240; inputs: [FIN], [OPS]. This arithmetic uses the supplied period totals; it does not establish causality, benefit, marginal cost or forecast performance.

Evidence coverage

Evidence coverage counts retained paragraphs in the supplied packet. Counts do not establish reliability or independent corroboration.

Decision options and rationale

Proposed option: Consider a one-quarter extension conditional on funding and weekly capacity monitoring. Rationale references: [OPS-P1, FIN-P2]. This is a customer-proposed option requiring reviewer judgment.

Limitations and reviewer questions

Clinical reviewer must assess safety, causality and patient confidentiality; this is not medical guidance.

Attribution establishes source lineage; source assertions have not been independently verified.

Confirm interpretation, rights and confidentiality before external release.
