

VAMP Performance

A January-June performance evidence review with real objective mapping, candidates and documentary gaps.

Illustrative demonstration

The following pages use fictional source records prepared for controlled testing. They are examples of the service output, not actual customer results or an independent professional endorsement.

This is evidence preparation for a performance conversation. It creates no employee rating, promotion decision or CPD award.

A customer engagement starts with your actual source material, an agreed scope, and an identified reviewer. Final interpretation and release remain with the accountable person.

Documents and decisions to obtain

Obtain the underlying dated outputs and authorisations. A statement that an article, timetable or planning email exists is not independent inspection of that artifact. Confirm objective mapping and evidence sufficiency with the responsible reviewer.

The supplied notes identify a review period, but do not independently establish dates for the underlying work. Obtain dated source records before treating work as occurring within this period.
